### About the artist

In 2011 Fee gave up her increasingly respectable career as a creative digital consultant in order to take up a new life as a bus-loving nomadic geek arts activist. In a reaction against the shift in global politics, she set out to discover how someone could disconnect as much as possible from a broken socio political system while maintaining meaningful connection to the people and places which enable her own vision of home and self. Her buslife, rants and projects celebrate otherness and humanness in a society dominated by homogeneity and corporations.
